

Radiation Shield *FP1810*

Features

- Protect temperature and humidity sensors from solar radiation and precipitation
- Compact size and light weight
- Permit easy passage of air

The Radiation Shield FP1810 protects temperature and relative humidity sensors from error-producing solar radiation and precipitation. Compact size and light weight make it easy to set up. The multiple plates block direct and radiated solar radiation, but permit easy passage of air.

Specifications

Radiation shield FP1810	
Number of plate	10 plates
Dimensions	120D × 260H (mm)
Weight	0.6kg
Installation sensor	Temperature and humidity sensors (5-30 diameter)
Mounting fits vertical pipe	30-50mm diameter
Material	Plate : UV stabilized white thermoplastic Bracket : Aluminum U-bolt clamp : Stainless steel
